1. Introduction. Acute myocardial infarction and acute stroke are two single most frequent causes of death or severe permanent disability worldwide. 20 years ago both these acute disorders caused extremely high mortality—between 20% and 30% among unselected hospital admissions.

Acute myocardial infarction and acute stroke: What are the

Long-term cost-effectiveness of early and sustained clopidogrel therapy for up to 1 year in patients undergoing percutaneous coronary intervention after presenting with acute coronary syndromes without ST-segment elevation

The pharmacoeconomic impact of amlodipine use on coronary

Acute retinal arterial ischemia, including vascular transient monocular vision loss (TMVL) and branch (BRAO) and central retinal arterial occlusions (CRAO), are ocular and systemic emergencies requiring immediate diagnosis and treatment.

Management of Acute Retinal Ischemia: Follow the

Postpericardiotomy syndrome (PPS) is a medical syndrome referring to an immune phenomenon that occurs days to months (usually 1–6 weeks) after surgical incision of the pericardium (membranes encapsulating the human heart). PPS can also be caused after a trauma, a puncture of the cardiac or pleural structures (such as a bullet or stab wound ...
