Expanded Age Range. The previous guidelines addressed diagnosis and treatment of ADHD in children 6 through 12 years of age. There is now emerging evidence to expand the age range of the recommendations to include preschool-aged children and adolescents.

ADHD: Clinical Practice Guideline for the Diagnosis

Best practices in care transitions are based on effective programs focusing on transitions from the hospital to home. There is very little research on transitions from the hospital to settings other than the home (such as emergency departments, nursing homes, or home health).⁵ Therefore, to date, providers must depend on these best practices in ...

Pregnancy is a hemostatic challenge: women are prone to thromboembolism during their pregnancy and at the same time, especially during delivery, there is substantial risk of bleeding.

Everything the clinician needs to know about evidence

Cardiology (from Greek $\kappa\alpha\rho\delta\iota\alpha\lambda\omicron\gamma\iota\alpha$ kardiá, "heart" and $\lambda\omicron\gamma\iota\alpha$ -logia, "study") is a branch of medicine that deals with the disorders of the heart as well as some parts of the circulatory system.

Cardiology - Wikipedia

The traditional practice of conducting the first outpatient review six weeks after cardiac surgery is not evidence-based. This study was designed to determine mortality and morbidity in the interval between hospital discharge and the first outpatient follow-up.
