

map projections a reference pdf

A map projection is a systematic transformation of the latitudes and longitudes of locations from the surface of a sphere or an ellipsoid into locations on a plane. Maps cannot be created without map projections.

Map projection - Wikipedia

This list provides an overview of some of the significant or common map projections. Because there is no limit to the number of possible map projections, there is no definitive list that includes all of them.

List of map projections - Wikipedia

as geographic coordinate systems. A projected coordinate system based on a map projection such as transverse Mercator, Albers equal area, or Robinson, all of which (along with numerous other map projection models)
