Purpose. Robotics in surgery is a recent innovation. This technology offers a number of attractive features in laparoscopy. It overcomes the difficulties with fixed port sites by restoring all 6 degrees of freedom at the instrument tips, provides new possibilities for miniaturization of surgical tasks and allows remote controlled surgery.

Laparoscopic Radical Prostatectomy with a Remote

INTRODUCTION. Sternal dehiscence is an infrequent but serious complication that is often a precursor to mediastinitis. Median sternotomy, which provides excellent access to the heart and surrounding structures, is the most commonly used incision for open cardiac surgery.
