

textile coloration and finishing pdf

In textile manufacturing, finishing refers to the processes that convert the woven or knitted cloth into a usable material and more specifically to any process performed after dyeing the yarn or fabric to improve the look, performance, or "hand" (feel) of the finish textile or clothing.

Finishing (textiles) - Wikipedia

Textile manufacturing is a major industry. It is based on the conversion of fiber into yarn, yarn into fabric. These are then dyed or printed, fabricated into clothes.

Textile manufacturing - Wikipedia

Abstract. Textile wet processing Industry is one of the highly water consuming industries, 17-20% of today's industrial pollution is the result of the textile coloring & treatment, contributing to 72 toxic chemicals in water supplies, 30 of which are permanent.

Coating and lamination are two functional processes which are used to make a proper finishing to the textile material. The coating formulation with different textile grade polymer like PVC, PU, acrylic, PTFE are hugely used to make a textile product with multipurpose way like- waterproof protective clothing, tarpaulin, protective clothing ...

A Review on Coating & Lamination in Textiles: Processes

Adsorption technique for the treatment of dye containing aqueous solution using low cost activated carbon has been investigated. The activated carbon (PAC2) was produced by the steam activation of New Zealand bituminous coal on an industrial scale.

Adsorption of Methylene Blue onto activated carbon

1. Introduction Although oxidation reactions are essential in several industries, most of the conventional oxidation technologies have the following drawbacks: non-specific or undesirable side-reactions and use of environmentally hazardous chemicals.

Industrial and biotechnological applications of laccases

There are a wide variety of insulation materials, facings, and accessory products available for use on mechanical systems. The list changes continuously as existing products are modified, new products are developed, and other products are phased out.
